

Peoria Gardens, Inc.
QUALITY GARDEN PLANTS FOR THE WHOLESALE TRADE

Peoria Gardens Sustainability

At Peoria Gardens we take pride in offering the highest quality plants. We believe a healthy environment leads to more gardening, and more gardening leads to a healthier environment. We are beekeepers ourselves and care deeply about pollinator insects.

We are proud to say we use **NO neonicotinoids**. With beneficial insects we have significantly reduced our use of pesticides. You might find a small card, or sachet, in the plants we deliver. These sachets are how the beneficial insects are applied to the crops, so keep it around to get the full benefit of these good insects. Careful sourcing of high quality **Non-GMO** seeds and plants, along with our knowledgeable staff, allows Peoria Gardens to deliver a product that is good for your customers as well as the environment.

Through investing in solar energy, advanced greenhouse coverings, and high efficiency heating systems Peoria Gardens has reduced our energy consumption by 30%. Sustainability is not just an

environmental responsibility; it is also a social issue. Peoria Gardens has eight employees with over 20 years of service, and six employees with over 30 years of service. We take care of our employees by offering **health care**, paid sick leave, twelve weeks of **paid maternity/paternity leave**, a **pension** and vacation.

Our employees are like family and we couldn't be more proud of our team.

Peoria Gardens delivers the highest quality plants to give you and the home gardener peace of mind.

Happy Gardening!
